Re Item V.

- 1 Reference is made to the following documents:

D1 : EP 1 277 670 A (WESTVACO CORPORATION; MEADWESTVACO CORPORATION) 22 January 2003 (2003-01-22)

- 2 Document D1, which is considered to represent the most relevant state of the art, discloses a unit dose package comprising a rigid moulded plastic locking mechanism comprising a child resistant trigger release mechanism.

From this, the subject-matter of independent claim 1 differs in that it discloses a cap for holding a unit dose blister comprising a child resistant trigger release mechanism.

- 2.1 The subject-matter of claim 1 is therefore novel (Article 33(2) PCT)
The problem to be solved by the present invention may be regarded as:
how to integrate a child resistant release mechanism for unit dose blisters in a cap for containers.

- 2.2 The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons:

no suggestion or hints is shown in the prior art is given pointing the skilled person toward the proposed solution. Starting from the unit doser dispenser of D1 and considering the above problem the skilled person would not arrive to claim 1.

- 2.3 Claims 2-17 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

3. A similar consideration can be made for independent claims 18 and 27 which are therefore also new and inventive (Article 33(2),(3) PCT).

- 3.1 Claims 19-26 and 28-35 are dependent respectively on claims 18 and 27 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
